

Interenergo

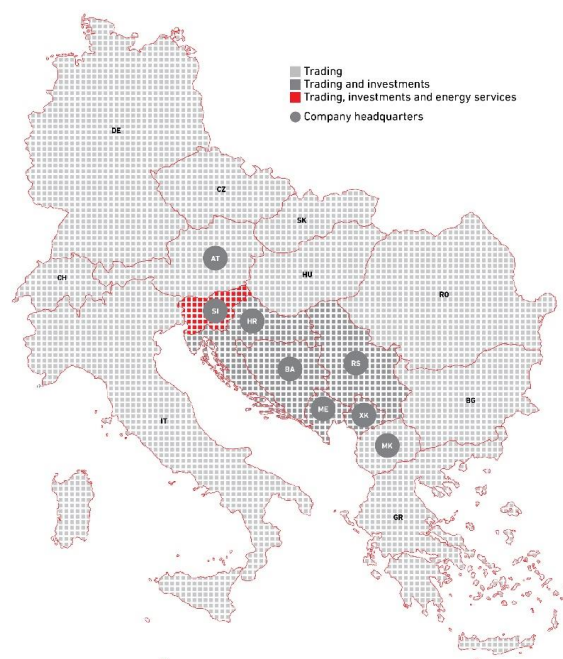

Interenergo is an international Ljubljana-based energy company and one of the largest of its kind in Slovenia. Since 2009, **interEnergo** has been part of the Austrian Kelag Group. The main activities include electricity trading, construction and management of energy facilities running on renewable energy sources (RES) and energy services. With their affiliated companies, they form the Interenergo Group.

The goal is to develop projects and solutions that create added value for partners and the market. **interEnergo** is always active and follows developments in the market, responding to them and integrating trends into the business model. In everything **interEnergo** does, they always take account of the responsibility to the environment, which is at the core of the group's sustainable orientation.

InterEnergo trades electricity in the wholesale market in 17 countries and at 14 international exchanges. It is invested in electricity production from renewable energy sources in six European countries. In Slovenia, which is the domestic market, **interEnergo** does not only

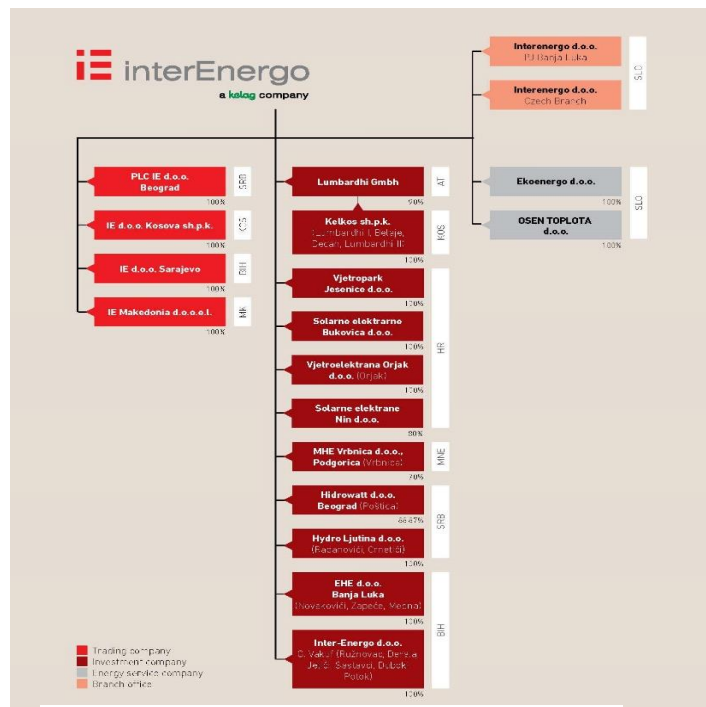

trade with electricity and invest in renewable energy sources but also provide energy services.

The Group comprises professionally trained and highly motivated professionals from different fields. Knowledgeable and skilful

individuals with professional competence — these are qualities that distinguish our employees who contribute to Interenergo's business excellence. In turn, Interenergo offers them a working environment that encourages and rewards their great enthusiasm and dedication.

Interenergo brings together companies that perform various activities and have their headquarters in one of European countries, such as Croatia, Bosnia and Herzegovina, Serbia, Montenegro, Kosovo, North Macedonia and Slovenia.

RES Management

The Renewable Energy Management service is a partnership between a renewable electricity producer and an energy trader, Interenergo d.o.o. In this partnership, the electricity producer lets Interenergo handle the wholesale market entry. This allows the producer to focus on

electricity production instead of also worrying about how to sell the electricity on the market e.g. due to risks associated with market unavailability or lack of market knowledge. As one of the major players in the South European electricity market, Interenergo supports

renewable energy producers with competitive solutions and with the knowledge needed to identify the right market opportunities.

Investments in electricity production from renewable energy sources are not only part of the current trends; rather, they are at the core of the Group's sustainable policy. All the facilities are equipped with state-of-the-art technology that provides efficient, reliable, and environmentally friendly electricity production. **interEnergio** invests in projects for the production of electricity from renewable sources in various countries. The locations of the various projects are shown on the

InterEnergio offers tailor made services in the field of energy contracting. Energy contracting (EC) is a partnership agreement between the owner of the building and the energy service provider, i.e. Interenergo, d.o.o. The basis for this kind of agreement is the owner's willingness to upgrade or renovate the existing energy system or to make it more efficient meaning lower energy consumption and lower costs for the user. Having a strong capital background, **interEnergio** can take the financial burden and risks related to the investment thus unburdening the owner.
